

Greenlite is transforming financial crime detection with AAM

AI COMPLIANCE AGENTS • AKAMAI AI AND API MANAGER (AAM) • SECURE GLOBAL SCALE

Greenlite transforms compliance workflows for financial crime and anti-money laundering with AI agents. By partnering with Akamai AI and API Manager (AAM), they streamlined API management, enabling secure, scalable, and efficient global integrations.

Challenges

- **Integrations**
Deep integrations with customers' systems required a robust API.
- **Regulatory**
Ensuring compliance with financial regulations and security requirements.
- **Infrastructure**
High overhead in setting up and maintaining API infrastructure.
- **Scalability**
Need for a scalable solution to support global deployment and future growth.

The AAM solution

- **Configurable gateway**
Provided a highly configurable API gateway with best practices built in.
- **Routing & rate limiting**
Enabled easy routing and rate limiting to manage API traffic efficiently.
- **Global deployment**
Facilitated global deployment with built-in CDN and regional traffic forwarding.
- **Expert support**
Offered responsive and expert support to resolve issues quickly.

Key results

Reduced

overhead for time and resources spent on API management

Seamless

global scalability with efficient traffic routing

Improved

security and compliance with regulations

Developer

efficiency improving overall productivity

About Greenlite

Greenlite specializes in AI agents for financial services. The company helps financial institutions handle regulatory compliance, fraud prevention, and back-office operations with greater efficiency and capacity. By automating traditionally manual processes, Greenlite empowers its clients to focus on innovation while staying ahead of regulatory demands.

The journey to AAM

Greenlite, specializing in AI agents for financial crimes and anti-money laundering, needed an API gateway to manage deep customer integrations. After discovering AAM online, they were impressed by its user-friendly interface and robust support. Previously relying on custom-built solutions, Greenlite chose AAM for its configurability, expert team, and seamless implementation of best practices.

AAM delivered significant benefits: quick setup, easy updates, and robust security, authentication, and authorization features to ensure regulatory compliance. Its routing, rate limiting, and CDN capabilities enabled efficient global deployment and enhanced user experience. By reducing infrastructure overhead, AAM allowed Greenlite to focus on their core business while ensuring expert API management.

AAM has always been fast and easy to use for us. It's been able to handle our workloads, and I think the support, the literature, and the team really encourages you to have the best version of your API.
