

We didn't invent API management.

We just perfected it.

API MANAGEMENT REIMAGINED FOR THE EDGE

> Optimized for Edge

Deploy anywhere in seconds with AAM's cloud-native, edge-optimized platform.

> 10x Developer Efficiency

Boost productivity by 10x and engagement by 3x. "Our engineers absolutely love working with AAM, and compete for tickets to work with it," says Ryan Waites, Senior Director, Blockdaemon.

> Infinite Scalability

AAM's architecture handles millions of requests per second, scaling to meet high traffic demands.

API Management Reimagined for the Edge

Akamai AI and API Manager (AAM), the only programmable edge-native API gateway, delivers an unmatched developer experience, and enterprise-grade capabilities.

> Bank-Grade Security

SOC 2 Type 2 certified with OAuth, JWT, mTLS, and fine-grained authorization policies.

> Programmable Gateway

Fully programmable, GitOps-enabled, and customizable for RBAC, quotas, and rate limiting.

> Reliable Documentation

OpenAPI-aligned documentation prevents API drift, reduces errors, and boosts conversion and developer satisfaction.

> Real-Time Performance

Ultra-low latency and up to five 9s availability powered by a globally distributed edge architecture.

> Revenue-Driven API Strategy

Monetize APIs effortlessly with self-service portals, API keys, and analytics, driving 10x conversion rates.

> 70%+ Cost Savings

AAM can cut buying and operating API management costs by 70%.

Why Use AAM?

Capability		Kong	MuleSoft	Axway	Apigee
Built for Edge Deployment	✓	–	–	–	–
Bank-Grade Security w/ SOC 2 Type 2 *	✓	✓	✓	✓	✓
Natively built for programmability and customization	✓	–	–	–	–
Frictionless API Monetization	✓	–	–	–	–
Natively powered by OpenAPI	✓	–	–	–	–
Native IaC for optimized GitOps	✓	–	–	–	–

* BASED ON PUBLICLY AVAILABLE INFORMATION.

We wanted true EDGE performance to handle our worldwide customer base and high throughput. AAM, combined with their customizability, over-delivered on both.
